SUMMARY

B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience in software development, backend systems, and AI applications. Passionate about building scalable and practical solutions through projects, internships, and hackathons.

EDUCATION

Bachelor of Technology in Computer Science

Gyan Ganga Institute of Technology & Sciences (RGPV)

- Specialization in **Artificial Intelligence and Machine Learning**
- CGPA: 7.82

Sep 2024 - Sep 2028

Central Board of Secondary Education

Maharishi Vidya Mandir, Narmada road Jabalpur (M.P.)

- Senior School (XII), Percentage : 80%
- Secondary School (X), Percentage : 70.6%

2024

2022

TECHNICAL SKILLS

- Languages:** Python, C++, Java, SQL
- Frameworks/Tools:** Django, Flask, Git, GitHub
- AI/ML:** NLP, Machine Learning, spaCy
- Databases:** MySQL, PostgreSQL
- Core Subjects:** DSA, Operating Systems, Computer Networks

WORK EXPERIENCE

- AI/ML Developer Intern | Cerope**
- Feb 2026 – Apr 2026 | Remote, Worked on backend features for AI-based applications including chatbot integration and analysis modules. The role involved exploring different approaches, understanding existing models/APIs, and building working implementations based on project requirements.
- Open Source Contributor (Girl Script Summer of Code, Open Source Connect India, etc)**
- Jul 2025 – Nov 2025 | Remote, Majorly contributed in an open source project named aeroplane-simulator

PROJECTS

Open Pulse - AI-Powered GitHub Dependency Explorer ([Live URL](#))

- An interactive AI 3D dependency-graph explorer for any public GitHub repository. Users enter a repo in owner/name format; a FastAPI backend fetches its package.json and renders all packages as a fully navigable 3D scene in the browser using react-three-fiber. Engineered to handle graphs with 50+ nodes at a smooth 60 fps via level-of-detail culling and optimised re-renders. Deployed end-to-end on Render and Vercel.

AlgoVisualizer

- Developed a web-based algorithm visualizer to demonstrate sorting and pathfinding algorithms with interactive controls and real-time execution visualization. Worked on both backend integration and deployment.
- Tech Stack: HTML, CSS, JavaScript, Python (Django), MySQL.

ACHIEVEMENTS

- 1st Runner-up at Genethon** - My very first national-level hackathon in 1st semester.
- 2nd Runner-Up at FOSS Hack localhost:Jabalpur 2026** : a national-level open-source hackathon organized under India's largest FOSS hackathon initiative.
- Pears Global Hackathon** - Gained Hands on Experience of team work & won exclusive prizes.
- Published speculative fiction novel The Archive of Unwritten Futures (ISBN - 979-8285537793).**

CERTIFICATIONS

- Oracle** - Oracle Cloud Infrastructure 2025 AI Foundations Associate
- AWS** - AWS Educate Machine Learning Foundations
- Udacity** - Introducing Generative AI with AWS
- Cisco** - C, C++, Python (Advanced)
- HackerRank** - SQL (Advanced)
- Microsoft** - Mastering Github
